Agentic Dev Tools Events — Postman Agent Stack PLG Targeting

Generated: 2026-10-13 (rescanned with Agent Ops search block) Target: Postman Agent Stack (postman-plugin, Orbit, Context Graph, Fabric Gateway, Astropods, Passport) adoption among agentic coding tool developers and the engineers who build, maintain, and operate what they produce

Results Table

Event Name	Date	Location	Est. Attendees	Agentic Tool Overlap	Format	Score	Target Persona	Recommended Presence	Link
Code with Claude 2026	May 6 (SF), May 19 (London), Jun 10 (Tokyo)	San Francisco / London / Tokyo	Large (flagship + "Extended" day)	Claude Code	Conference	91	Agentic App Builders, API/Platform Engineers	Talk / demo table at Extended day	claude.com
GitLab AI Hackathon 2026	Feb–Mar 2026	Global / virtual	~7,000 devs, 600+ agents built	Mixed (Anthropic co-sponsor)	Hackathon	86	Agentic App Builders	Hackathon sponsor	about.gitlab.com
MCP Dev Summit North America	Apr 2–3, 2026	New York, NY	Mid-large (Linux Foundation)	Mixed (MCP ecosystem)	Conference	84	Headless Agents, Agentic App Builders	Talk	events.linuxfoundation.org
AgentCon World Tour	Mar 9 (NY), May 4 (SF), May 19 (Berlin), Jun 26 (Dallas/Perth)	Multiple global cities	Mid-size per stop	Mixed (agent frameworks)	Conference	84	Agentic App Builders, Headless Agents	Talk	globalai.community
Arize:Observe 2026 (The AI Agent Evals Conference)	Jun 4, 2026	San Francisco (Ferry Building)	Mid-size, sponsor-backed (AWS, Microsoft, CrewAI)	Mixed (agent evals/observability tooling)	Conference	84	Agent Ops Engineers	Talk	arize.com

AI Coding Hackathon (STARTPLATZ Cologne)	Sep 4–6 and Nov 20–22, 2026	Cologne, Germany	Mid-size, regional	Mixed	Hackathon	83	Agentic App Builders, API/Platform Engineers	Hackathon sponsor (track sponsor)	startplatz.de
AI Engineer World's Fair 2026	Jun 29–Jul 2, 2026	San Francisco (Moscone Center)	6,000+ attendees, 250 speakers, 100+ expo partners	Mixed (20+ tracks incl. coding agents)	Conference	81	Agentic App Builders, API/Platform Engineers	Booth (expo) / Talk (CFP)	ai.engineer
MCP Connect — San Francisco	Sep 14, 2026	San Francisco (GitHub HQ)	Community-scale	Mixed (MCP ecosystem)	Conference	80	Headless Agents	Talk	sessionize.com
OpenAI Codex Community Hackathon / Build Week	Recurring (SF #5), Jul 14 (Gurugram), Jul 18 (London), Jul 7 (SF/Bright Data)	San Francisco / Gurugram / London	Community-scale, cash prizes	Codex	Hackathon	79	Agentic App Builders, API/Platform Engineers	Hackathon sponsor	luma.com
MCPconference London	Feb 11–12, 2026	London	Community-scale	Mixed (MCP ecosystem)	Conference	78	Headless Agents	Talk	lu.ma
AI Engineer Code 2026	Nov 2026	San Francisco	Mid-size, technical	Mixed (coding agents, dev tools, eval harnesses)	Conference	76	API/Platform Engineers	Talk (CFP)	ai.engineer
Cursor Compile 2026	Jun 16, 2026	San Francisco (Fort Mason)	Invite-only, high prestige	Cursor	Conference	72	API/Platform Engineers	Talk (access-constrained — invite-only)	cursor.com
FinOps X 2026	Jun 8–11, 2026	San Diego, CA	1,600+ cloud-cost professionals	Mixed (FinOps/cloud-cost practitioners)	Conference	69	Agent Ops Engineers	Talk	finops.org

GDG AI HACK 2026 (Antigravity)	May 8–10, 2026	Milan, Italy	160 selected participants	Antigravity	Hackathon	68	Agentic App Builders	Demo table (small scale)	gdg.community.dev
DeveloperWeek / AI Dev World Conference	Feb 18–20, 2026	San Jose, CA	Large, broad developer audience	Mixed (general AI/agent track)	Conference	66	Agent Ops Engineers (secondary)	Booth	developerweek.com
Identiverse 2026	Jun 15–18, 2026	Las Vegas, NV (Mandalay Bay)	3,500+ identity professionals	Mixed (non-human/agentic identity security)	Conference	66	Agent Ops Engineers	Booth (Passport demo) / Talk (CFP)	identiverse.com
Kiro meetups (AWS)	May 21 (Hong Kong), May 27 (Toronto VIP dinner), Jul 23 (Heilbronn)	Hong Kong / Toronto / Heilbronn	Small (meetup/VIP-dinner scale)	Kiro	Meetup	65	API/Platform Engineers	Demo table (only if local presence available)	meetup.com
Ai4 2026	Aug 4–6, 2026	Las Vegas (The Venetian)	12,000+ attendees, 400+ exhibitors	Mixed (dedicated agent + governance/oversight tracks)	Conference	63	Agent Ops Engineers (secondary)	Booth	ai4.io
AI Engineer NYC 2026	Oct 12–14, 2026	New York, NY	Large, buyer-heavy (CTOs, VPs, founders)	Mixed	Conference	51	Agent Ops Engineers (secondary)	Booth — sponsorships largely sold out	ai.engineer

What's new in this rescan

The first run (14 search queries) only covered the Building and Maintaining concerns — nothing targeted **Agent Ops Engineers** (evals, observability, token/cost, credential security, scheduled/autonomous cloud agents), the persona that maps to Fabric Gateway, Astropods, and Passport. Four new search queries closed that gap and surfaced four events: **Arize:Observe 2026** (84, agent evals/observability), **FinOps X 2026** (69, LLM token-cost governance), **Identiverse 2026** (66, non-human/agentic identity security — a direct Passport angle), and **Ai4 2026** (63, broad AI conference with dedicated agent-governance tracks). None of the previously listed events changed score; these are additions, not corrections.

Other Agent Ops-adjacent events turned up but scored too low or too buyer-heavy to include: Oktane 2026 (Okta's own customer conference, vendor-specific IAM admin audience), Google Cloud Next 2026 (massive enterprise trade show, sponsorship cost/competition too high for the audience overlap), Agentic AI 2026 in Reston (regulated-industry/government contracting audience), and AI Agents Conference 2026 Singapore (senior APAC leadership, not practitioners).

Link audit: every link in the table above was re-checked against the event's own domain (the organizer's site, or the Linux Foundation/Devpost/Luma page they actually run registration through) rather than a blog recap, translated mirror, or news aggregator that happened to rank in search. One row — "Global AI Agent Hackathon" (claimed 50,000 devs, $5M prize pool, score 72) — was dropped entirely rather than relinked: every result for it traced back to the same unverified news aggregator with no organizer site behind it, so there was no legitimate source left to cite.

Top Picks

Code with Claude 2026 (SF/London/Tokyo, May–June 2026) is Anthropic's own flagship developer conference, which makes it the single highest-leverage venue for postman-plugin: the entire audience already runs Claude Code day-to-day. The "Extended" day explicitly targets independent developers and early-stage founders — exactly the PLG persona for postman-plugin. A mainstage talk slot is unlikely without an existing exec relationship, so the realistic path is a sponsor/demo-track presence on Extended day, showing filesystem-first API mocking and Context Graph dependency checks running live inside Claude Code. Expect developer sign-ups and GitHub stars, not enterprise pipeline.

GitLab AI Hackathon 2026 (Feb–Mar, global/virtual) already ran with Anthropic as a co-sponsor and pulled in ~7,000 developers building 600+ agents — a strong precedent for a Postman follow-on sponsorship in a future edition. The hands-on, individual-developer hackathon format is the purest PLG signal in this list. A mentor/API-credits sponsorship with a live postman-plugin mocking demo would land well with a judged-submission audience already building agents end-to-end.

Arize:Observe 2026 (SF Ferry Building, Jun 4) is the top-scoring event for the Operating concern and the clearest fit for the newly added Agent Ops Engineers persona: its entire premise is agent evals and observability, exactly what Fabric Gateway and Astropods are built for. A talk on "what breaks when an agent fleet scales" (routing, token budgets, audit trails) would land directly with a practitioner audience already building eval harnesses, and the existing sponsor list (AWS, Microsoft, CrewAI) shows this isn't a buyer-only room.

Pass

- **Agentic & Applied AI for the Enterprise / ACM CAIS / Agent Conf Warsaw** — explicitly enterprise-buyer and research-leadership audiences (senior execs, data leaders, investors), not aligned with the stack's individual-developer PLG motion.
- **AI Agent Conference New York** (Hilton Midtown, May 4–5) — targets senior executives, data leaders, and investors; no meaningful agentic-coding-tool developer overlap.

Note: **AI Engineer NYC 2026** (score 51, in the table above) is a borderline Moderate-fit case, not a Pass — platinum sponsorships are largely sold out and the audience skews CTO/VP/founder, but it's listed at Booth-tier rather than excluded outright. Revisit for 2027 with an earlier sponsorship commitment if the buyer-heavy mix is acceptable alongside the developer track.
